

flaxo

developer tools builder

Türkiye · github.com/flaxodotdev · flaxo.vercel.app

about

I build developer tools from Türkiye. I'm obsessed with creating tools that save developers time and remove friction from their workflows. When I'm not coding, I'm reading, writing, or thinking about life philosophy.

projects

RexaDB

Database client built to solve my own workflow problems. Open source SaaS that saves time for developers who need better database tools.

↗ reaxadb.app · github

Keyring

RBAC system designed to remove friction from integrating role-based access control into any application. Built to give developers a sigh of relief.

experience

Developer Tools

Building open source developer tools including database clients and authentication systems. Focused on creating tools that solve real workflow problems and save developers time.

Transportation & Education

Previous work across various environments including transportation apps and educational platforms. Discovered my passion for developer tools through these diverse experiences.

skills

Developer tools · Open source · Database systems · RBAC · Full-stack development · Product design

Available for interesting developer tools projects.
